Professional Summary

Results-driven **Data Engineer** with hands-on experience designing and deploying end-to-end data pipelines, ETL/ELT workflows, and cloud-native data platforms on **AWS, Azure, and GCP**. Proven track record of integrating data from diverse sources (APIs, ERP systems, IoT, multi-platform streams) using **PySpark, Apache Kafka, PostgreSQL, and dbt**. Skilled in real-time and batch processing architectures, data modeling, and BI tooling with a strong MLOps foundation. Delivered a **15% revenue increase** through data-driven customer targeting at a fast-growing startup.

Technical Skills

Data Engineering & ETL/ELT: Apache Kafka, Apache Spark, PySpark, dbt, n8n, ETL Pipeline Design, Medallion Architecture (Bronze-Silver-Gold), Real-Time & Batch Data Processing

Cloud Platforms: AWS (EC2, ECR, S3, Glue, Lambda), Microsoft Azure, Google Cloud Platform, Hetzner

Databases & Storage: PostgreSQL, MySQL, MongoDB, NoSQL, Delta Lake, Data Warehousing, Snowflake

Orchestration & DataOps: Apache Airflow, Databricks, DataHub, Docker, CI/CD Pipelines, GitHub Actions, Azure DevOps

Data Visualization & BI: Metabase, Power BI, Pandas, NumPy, Exploratory Data Analysis

Programming Languages: Python, SQL, Scala, R, Java

Data Formats: JSON, CSV, Parquet, Delta Lake, XML

ML & Analytics: Scikit-learn, MLflow, FastAPI, Statistical Modeling, A/B Testing, Feature Engineering

Professional Experience

Data & AI Engineer (MLOps | Automation | Analytics)

Jul 2025 – Present

Scallar IT Solution | Full-time

Noida, Uttar Pradesh, India · Hybrid

- Designed and built an **end-to-end analytics platform** for mid-sized clients, integrating data from Excel, APIs, and ERP systems using **n8n for ingestion, PostgreSQL for storage, dbt for transformation, and Metabase for BI dashboards** — enabling self-serve reporting across business units.
- Engineered a **real-time WhatsApp automation and lead management pipeline** using WAHA, n8n, and AI models (OpenAI/Claude), automating data capture, classification (hot/warm/cold/spam), CRM updates, and downstream follow-up workflows.
- Built a **full customer lifecycle data pipeline** integrating Chatwoot, Mautic, and Twenty CRM — enabling automated engagement tracking, nurturing workflows, and sales pipeline visibility from acquisition to conversion.
- Led **end-to-end solution ownership**: requirements gathering, data architecture design, cloud deployment, and continuous pipeline optimization across client environments.
- Managed **multi-cloud infrastructure** across AWS, GCP, Azure, and Hetzner — ensuring scalable, reliable, and cost-efficient data platform deployments.
- Applied **MLOps practices in production**: model integration, API deployment via FastAPI, and automated pipelines for both real-time and batch processing workflows.

Data Science Intern

Jan 2025 – Jun 2025

Scallar IT Solution

Noida, Uttar Pradesh, India

- Created **ML data processing pipelines** using **PySpark and Apache Kafka** for multi-platform user data collection, enabling targeted lead generation for web development and digital marketing services.
- Designed and deployed ML models with Scikit-learn (KNN, K-Means clustering) to predict customer behavior and **enhance segmentation accuracy by 25%** through statistical analysis.
- Automated **model deployment using Docker and GitHub Actions CI/CD on AWS EC2**, reducing manual acquisition time and streamlining production workflows with MLOps methodologies.
- Collaborated with marketing teams to integrate ML predictions into strategy, delivering **15% revenue growth** through optimized lead targeting, A/B testing, and improved data processing efficiency.

Key Projects

End-to-End ML & Data Pipeline (MLCIETLDeploy) | *Python, dbt, Docker, AWS, FastAPI, MLflow* **2024**

- Built a production-ready **data pipeline from ingestion to model serving** using Scikit-learn, Docker, and AWS (EC2, ECR) with comprehensive ETL design, statistical modeling, and predictive analytics.
- Integrated **FastAPI for real-time model serving** with automated CI/CD via GitHub Actions; implemented experiment tracking with **MLflow** and an A/B testing framework for model validation.

Real-Time Gym IoT Streaming Pipeline | *PySpark, Apache Kafka, Databricks, Delta Lake* **2024**

- Built a **scalable cloud-native streaming pipeline** on Databricks using PySpark and Apache Kafka, processing IoT fitness data in real time with hypothesis testing and anomaly detection capabilities.
- Implemented **Medallion Architecture (Bronze-Silver-Gold)** for data lake organization — enabling real-time analytics, time series analysis, and equipment performance monitoring at scale.

Customer Lifecycle Analytics Platform | *PostgreSQL, dbt, n8n, Metabase, Python* **2025**

- Architected a **multi-source data integration platform** pulling from CRM, email automation, and messaging tools into a unified PostgreSQL warehouse with dbt transformations and live Metabase dashboards.
- Enabled end-to-end **pipeline observability and monitoring** with automated alerting, data quality checks, and schema documentation — directly supporting business decisions for mid-sized clients.

Education

Bachelor of Technology in Computer Science **2022 – 2026**

Galgotias University

Greater Noida, Uttar Pradesh

- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Machine Learning, Statistics & Probability, Linear Algebra, Computer Networks, Software Engineering
- **Leadership:** Technical Lead for university hackathons; mentored junior students in programming, AI/ML; led cross-functional team projects in software development.

Certifications

MLOps Bootcamp | *Instructor: Krish Naik*

- Comprehensive MLOps training covering 10+ full-stack ML projects: pipeline design, statistical modeling, hypothesis testing, model deployment, and monitoring in production environments.

TensorFlow for Deep Learning Bootcamp | *Instructor: Andrei Neagoie*

- Intensive training in TensorFlow, neural architectures, computer vision, NLP, and production deployment strategies.

Achievements

- Drove **15% startup revenue growth** through data-driven ML customer targeting optimization and statistical analysis.
- Deployed **10+ end-to-end ML and data engineering projects** in production with full MLOps best practices.
- Implemented **real-time multi-source data processing solutions** handling diverse platform streams with 99% uptime.
- Solved **265+ LeetCode problems**, reflecting strong command of data structures, algorithms, and problem-solving.
